

## SOLARWINDS PRODUCT UPGRADE ADVISOR

💡 Before starting any work on your environment please ensure that you have a recent backup of your database.

### UPGRADE PATH

Follow these steps to upgrade your products:

Downloaded      Installed

		Downloaded	Installed
①	Upgrade <b>Network Performance Monitor</b> from version <b>12.4</b> to version <b>2020.2</b>		<input type="checkbox"/>
<p>💡 Infrastructure requirements for product module releases running atop Orion Platform 2018.4 and later have changed. Review the release notes and <a href="#">system requirements</a> prior to upgrading.</p> <p>SolarWinds strongly recommends that you upgrade to Microsoft Windows Server 2016 or later and Microsoft SQL Server 2016 or later, at your earliest convenience.</p>			
②	Upgrade <b>Server &amp; Application Monitor</b> from version <b>6.8</b> to version <b>2020.2</b>		
③	Upgrade <b>Network Configuration Manager</b> from version <b>7.9</b> to version <b>2020.2</b>		
④	Upgrade <b>Virtualization Manager</b> from version <b>8.4</b> to version <b>2020.2</b>		<input type="checkbox"/>
⑤	Upgrade <b>Server Configuration Monitor</b> from version <b>1.1</b> to version <b>2020.2</b>		
⑥	Upgrade <b>DPA Integration Module</b> from version <b>11.1.1</b> to version <b>2020.2</b>		<input type="checkbox"/>
⑦	Upgrade all scalability engines e.g. Additional Polling Engines, Additional Web Servers or High Availability Backup Servers.		

💡 After finalizing the updates to your main polling engine, upgrade all scalability engines (e.g. Additional Polling Engines, Additional Web Servers or High Availability Backup Servers) in parallel using [centralized upgrades](#).
